}
```

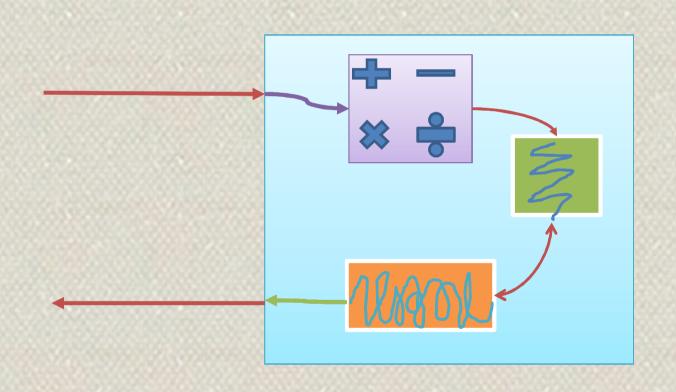

# 表达式求值模块化

• 要什么样的调用接口比较好?

# 好的模块

- 低耦合
- 高内聚

# 模块化的一个方案——库

- Jar
- Lib
- · DII

### 为什么要使用库

- 会使项目看起来更简捷
- 库无处不在
- 你要自己写完所有代码,包括一个 <iostream>?
- 别人的源吗被不小心改掉了
- 更有利于分工协作

## Java方案

```
workspace - Java - Test/src/main/ExpMain.java - Eclipse
File Edit Refactor Source Navigate Search Project Run Window Help
                                                                                    result = String.valueOf(ArithHelper
                                                                                     121
